WHO WE ARE

DNG Renewables is part of DNG group of companies. We develop and provide game-changing renewable and sustainable dispatchable energy solutions for the South African and African markets

Our offering is made up of solar and wind power, as well as storage and supply balancing facilities that can adapt to natural weather cycles and create sustainable energy systems that enhance local infrastructure. We concern ourselves with supporting our continent with its transition to a sustainable energy future.

DNG Renewables promotes the sustainable use of clean energy in the pursuit of the advancement of energy security, low-carbon economic growth, and prosperity.

OUR VISION

Energising a brighter future.

OUR MISSION

- Deliver solar and wind power solutions that are simple, accessible, and affordable.
- Champion a path to decarbonisation.

OUR GOALS

- Enable clean energy.
- Promote good health.
- Benefit the environment.
- Facilitate equitable economic growth.

WHAT WE DO

In response to the growth energy demand in South Africa and on the African continent, we are committed to the accelerated use of modern renewable energy sources. Our solutions include solar and wind power, as well as storage facilities to alleviate the ongoing electricity supply crises that impede our economic growth and burden the livelihoods of people. Our offering is designed to facilitate a cost-effective transformation to a cleaner and more secure power region. This is combined when necessary with reasonable and sustainable supply balancing projects to ensure responsible dispatch ability.

We want to promote meaningful socio-economic and enterprise development, preserving and creating jobs to improve the wellbeing of communities while creating shared value among fellow Africans.

Our objective is to generate clean energy that produces zero greenhouse gas emissions and improve the environmental and economic benefits of societies, especially in disadvantaged areas in desperate need of access to sustainable, reliable clean energy.

RENEWABLE ENERGY BENEFITS

- 1 Environmentally friendly.
- 2 Unlimited supply.
- 3 Low maintenance and long-life spans.
- 4 Cost-effective and efficient.
- 5 Health and environmental advantages.
- 6 Affordable remote and off grid energy solutions.
- 7 Good storage capabilities.

ABOUT DNG ENERGY

DNG Energy was founded in 2013 by South African entrepreneur, Aldworth Mbalati, with the vision of achieving energy security and stability.

As a 100% black-owned African entity, DNG Energy is creating a pan-African Liquefied Natural Gas (LNG) supply network. A widescale infrastructure programme will see a US\$5 billion investment to bring this affordable energy alternative to the market.

The initial development and infrastructure expansion programmes are being planned for South Africa, Mozambique, and Nigeria.

DNG Energy is looking at the LNG value chain from source to consumption holistically.

The environmental, social, and economic benefits that come with the use of LNG include helping South Africa to meet its targets in reducing greenhouse gas emissions, driving economic growth, and improving the lives of all citizens.

As a first step in contributing to sustainable development, DNG Energy is championing the use of LNG for road and maritime transport, specifically for minibus taxis, trucks, buses, and ships. LNG is a new way of delivering energy. It offers the market a cleaner, cheaper fuel alternative where transactions are digital as well as safe.

The transport of LNG from exporting countries to South Africa will happen predominantly by sea. DNG Energy has commissioned South African Shipyards in Durban to build an 8,000 ton LNG Barge that will be moored at Coega. This is the largest vessel by weight ever to be built on the African continent and will come into service in 2021.

DNG Energy is ISO 9001, 14001, and 45001 certified, representing its commitment to excellence, quality, and ongoing improvement.

OUR VISION

Energising a brighter future

OUR MISSION

- Bring energy security and supply stability to Africa, using cleaner and affordable energy solutions to help mitigate climate change while stimulating economic growth and social cohesion.
- Commit to bring cleaner smart fuel and energy to people, organisations, and communities.

OUR VALUES

Everything we do is underpinned by transparency and integrity as we pursue and instill:

- Excellence
- Consistency
- Creativity
- Resourcefulness

OUR GOALS

- Transform South Africa's energy landscape through the advancement of LNG.
- Serve the demands of a growing population, increase industrial output, and improve people's lives.
- Support the South African government to meet its targets of reducing greenhouse gas emissions.
- Help South Africa's public transport industry to transport millions of South Africans in an environmentally cleaner, safer, responsible, and more affordable way.
- Boost local manufacturing and investment.
- Bring natural gas power to thousands of companies and households.
- Drive economic growth through the transfer of skills and creation of employment.
